

# SILICONE GREASE

Part #RT 910T  
3 oz. Tube

## DESCRIPTION

Food Grade Silicone Lubricant 95%, with antioxidant and corrosion inhibitors. NSF authorized for use in federally inspected meat and poultry plants. Rated H-1 for incidental food contact. Non toxic, non staining material having exceptional physical and thermal stability.

## USAGE

The lubricant of choice for food equipment, water fixtures and in high or low temperature appliances. Silicones are compatible with most plastics, rubber, leather, composite fibers and metal. A very effective sealing lubricant for o-rings, valves, vacuum and pneumatic controls. It's high dielectric strength allows for the safe lubrication of electromechanical devices.

## ADVANTAGES

Silicone Greases are used as a clean lubricant substitute in places where petroleum oils are inadequate or not desirable. Waterproof and chemical resistant. Stable consistency over a wide temperature range with extremely low volatility.

NSF Approved

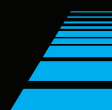

## SPECIFICATIONS

### TEST

### ASTM METHOD

### RESULTS

Color	-----	Translucent White
Penetration	-----	3
Flash Point	D-217	>570 F
Bleed	F.S. 791	None
Dropping Point	D-566	None
Pour Point	D-97	-45 F
Water Washout	D-1264	0.75%
Evaporation Loss	D-972	30% @ 390 F
Specific Gravity	D-2225	1.03
